

SNIFFERS for SCHOLARS

MCDI's Research Program for Grad Students

PROJECT & COST REQUIREMENTS

Before applying for the SNIFFERS for SCHOLARS program, please ensure you/your project are aligned with the following requirements:

✓ PROJECT REQUIREMENTS:

- The project location must be within 200 miles of Greater Milwaukee Area.
- The student must be present for MCDI-provided field work.
- An MCDI staff member must be involved in the development and reporting of canine scent detection methods and discussion, to ensure proper accuracy.
- The student will be required to agree to MCDI's Policies and Procedures and sign a Release of Indemnification document before any work would begin.

✓ COST REQUIREMENTS:

For your project, the services provided by MCDI are contracted similarly to specialty diagnostic tools and equipment. Please share your project's ability to cover the cost of research tools within your application request.

Additionally, we understand that not every project has funding. While the project's fund level will not determine our interest in working with you, we have limited scholarship funds available. Please indicate in your application if you're interested in applying for an MCDI Sniffers for Scholars Scholarship.
